Option 2 — Generative AI / RAG Search ("Ask SPARKS" chat box)

Existing OpenSearch pipeline is UNCHANGED (grey lane). The new AI path reads the same outbox read-only and answers via Claude with citations. Each box is labeled with its AWS service + role.

Legend: pink = messaging/API · orange = AWS Lambda (compute) · teal = Amazon Bedrock (AI) · purple = OpenSearch · green = S3 storage · blue = user · grey = unchanged
